Solution

The Mobile CCTV solution provides everything you need in a convenient and mobile surveillance solution. There is not any kind of unforeseen costs or challenges when you are in need of a watched a construction site, a backyard, a fenced area or something entirely different.

Our mobile monitoring solution is ready for video surveillance, with no need of power or anything else. When you rent our mobile surveillance, we deliver the complete solution and make it up and running for you and then you will have immediately video surveillance.

MODEL PHOTO

The steel and galvanized trailer has all the equipment on board from mast, cells, solar panels, windmill, router to the DVR and camera and everything is properly secured, so you do not have any unforeseen challenges.

When our mobile surveillance solution is set up where you need, you will automatically be notified via an SMS, email or both simultaneously if the camera detects motion in the area that you want secured. Furthermore, our solution gives you the opportunity to get live video on the area detected and what is happening - directly home from your own PC. Naturally, the solution can also be configured for alarm calls directly to your existing alarm central partner who also can see live video directly through their PC. All footage is recorded also in a solution-mounted DVR for possible future use towards the insurance company and / or police.
