SECURINESS SentryHound-PRO ferrous detector.

Feature and Application

SentryHound-Pro™ Ferromagnetic Contraband Screener is a single pole (add a 2nd pole for complete walk through) solution to detect unauthorized or illegal cell phones, tablets, laptops, smart watches, wearable's and even weapons including guns, knives and makeshift shivs and shanks.

SentryHound-Pro's ferromagnetic detection zones are highly sensitive to trace amounts of ferrous material found in plastic cell phones and miniaturized electronics. These same cell phones slip through regular metal detection but not SentryHound-Pro because of its sensitivity, unique motion detection and enhanced false trigger rejection.

This allows rapid, non-invasive inspection of pockets, bags, purses, clothing and even body cavities.

Use a single pole for impromptu checkpoints, doorways and wall mounted ferromagnetic detection zones.

Use dual pole configuration (wirelessly tethered) to minimize false triggers and expand detection range over 5 feet wide.

Setup is simple and can be done anywhere – Plug and play out of the box with less than 30 seconds from powering up to full operation. No software or assembly required. SentryHound-Pro ferromagnetic contraband screener is lightweight (only 17 pounds) so it can be easily transported and deployed by any security personnel instantly.

Unlike most walk-through metal detection systems, SentryHound-Pro detects full head-to-toe (75 inches) with light-up zones to pinpoint the area of interest. The domed, omnidirectional alert is highly visible and the audible

alert can be easily adjusted for maximum effect. SentryHound-Pro Ferromagnetic Contraband Screener is fully sealed against the elements for rugged indoor and outdoor use. It contains a sealed gel cell internal rechargeable battery for a full day of continuous power anywhere.

SentryHound-Pro also features security key lock and dry trigger contacts for alarms, DVRs, video surveillance and intrusion detection systems.

- Single pole setup anywhere in under 30 seconds
- Lightweight, versatile & all day battery power
- Sealed against the elements for rugged indoor/outdoor use
- Add a 2nd pole for double duty or double detection range
- Full ferromagnetic non-invasive inspection zone up to 64" wide by 75" high (two pole configuration)
- Detects contraband cell phones (ON or OFF), smart watches, tablets, knives, guns, razors, etc.
- Key lockable for security reassurance
- Most advanced ferromagnetic contraband screener available with distinct ferromagnetic detection zones to pinpoint contraband
- Advanced motion detection and false trigger rejection using dual pole configuration
- Perfect for FBoP, DoD, NSA, FBI & any secure government or military SCIF
- Designed and manufactured entirely in the U.S.A.

- 230V power supply and built in backup battery, with more than 24 hours use on fully charged battery.
