

X-Bag

RF shield

Specifications are subject to change  Kontakt os venligst for mere information

X-BAG RF shield.

X-Bag products offer an impressive RF shielding performance of far more than 100 Db. Highest RF screening performance even in the high GHz range.

Probably offers the best RF and EMC screening worldwide for this product and price category.

The material characteristics used in the production of the X-BAG products is certified under MIL-STD-285 standard which guarantees the increasing demand for X-BAG products.

If devices which use wireless communication such as mobile phones, remote controls, GPS, tablets and laptops placed in a X-BAG shielding bag, they are immediately isolated from sources of communication, BTS, WIFI, Bluetooth and other satellite signals.

Usage:

- Cell Phones
- Smart phones
- RFID technologies
- Bank cards
- Flash memory

Specifications:

- Shielding: RF & LF electric fields
- Frequency range: 1 MHz to 30 GHz
- Damping (db): over 100 db
- Damping (%): 99,99999999 %
- Screening material: Copper/Nickel
- Carrier material: Polyester
- Color: Silver
- Thickness: 2 mm/ 5mm (top with magnetic closing)
- Weight: approx. 25 gr. depending on size.
- Dimension, depending on model, smallest is: 14x17 cm when closed
- Inner space: up to 6" (diagonal)
- Comes in 4 different sizes.
